MARVEL CHAMPIONS

THE CARD GAME

HELL'S HUNT

RULEBOOK

HELLFIRE HUNT

"We'll contact those mutants, just as Xavier plans to – only the Hellfire Club will get there first, and recruit them – by hook or by crook." —Sebastian Shaw

Welcome to the *Hellfire Hunt* campaign expansion! This set comes with five new scenarios that tell the story of the Hellfire Club, exclusive society of wealthy and influential individuals, with some powerful mutant members.

Villain Cards

Each of the five scenarios in this expansion features a diabolical villain: White Queen, Sebastian Shaw, Selene, Emma Frost (as an X-Men), and Cassandra Nova. Each scenario has its own page in this rulebook

Identity Cards

Two pre-built player decks introduce two new heroes: Marvel Girl and Sunspot. See page 18 for their decklists.

COMPONENTS

- 371 cards, consisting of 113 player cards, 24 villain cards, and 234 encounter cards.

SET SYMBOL

Cards from the Hellfire Hunt expansion can be identified by this set symbol.

FEATURED KEYWORDS

Guard X
While a minion with the guard keyword is engaged with a player, that player cannot use cards they control to attack a villain without this keyword.

Hinder X
When a card with hinder X enters play, place X threat on that card.

Incite X
When a card with incite X is revealed, place X threat on the main scheme.

Patrol
While any minions with patrol are engaged with a player, that player cannot use cards they control to thwart the main scheme.

Permanent
A card with permanent cannot be defeated, leave play, or have any part of its text box blanked.

Piercing
An attack with piercing discards any tough status cards from the attacked character before dealing damage.

Ranged
An attack with ranged ignores the retaliate keyword.

Setup
A card with the setup begins the game in play.

Stalwart
A character with stalwart cannot be stunned or confused.

Steady A character with steady can have one additional stunned status card and one additional confused status card. That character is not stunned unless they have two stunned status cards, and is not confused unless they have two confused status cards. After that character's activation is replaced by a status card effect, remove all status cards of that type from that character.

Team-Up

The team-up keyword names two characters. In order for a player to include a card with the team-up keyword in their deck, that player's chosen identity must match one of the named characters. Additionally, a card with the team-up keyword cannot be played unless both of the named characters *(identity or ally)* are in play.

Temporary

A card that has the temporary keyword is discarded at the end of the round.

Victory X

When a card with victory X is defeated, place it in the victory display instead of its owner's discard pile.

Villainous
When a minion with villainous activates, give it a facedown boost card from the top of the encounter deck. When you resolve that minion's activation, turn the boost card faceup, resolve any boost ability on that card, and apply its boost icons to the minion's stats for this activation. Discard the boost card after the activation.

Armored X

Reduce the amount of damage this character takes from each attack by X.

VICTORY DISPLAY

The victory display is an out-of-play game area shared by all players. Cards in the victory display follow the standard rules for out-of-play cards.

AMPLIFY ICON

The amplify icon increases the number of boost icons on boost cards. When a boost card is turned faceup during an enemy activation, add one additional boost icon to that card for each amplify icon in play.

ADDITIONAL RULES

"Find"

When you are instructed to find a card, search each area where the card could be found (play area, set-aside area, player deck, discard pile, encounter deck, etc). Players should not unnecessarily search game areas if they know where the card they are looking for can be found. Do NOT look at facedown encounter cards currently dealt to players.

CAMPAIGN MODE RULES

Each scenario in the *Hellfire Hunt* expansion can be played individually, or together with the other scenarios as part of one epic campaign where the outcome of each game impacts the next scenario. To complete the campaign, the players must win all five scenarios in numerical order, starting with scenario #1 – White Queen and ending with scenario #5 – Cassandra Nova.

To begin a campaign, the players start by choosing their heroes. Each player must use their chosen identity for the entire campaign, but they are free to change aspects and alter the contents of their deck between scenarios, following the deck customization rules in the *Marvel Champions* Rules Reference.

To play a scenario in campaign mode, set up the scenario as per the normal rules of the game. Then, follow that scenario's setup instructions in the order in which they are listed in the Campaign Instructions.

When the game ends, if the players won, follow that scenario's victory instructions in the order in which they are listed in the Campaign Instructions. If the players lost, they may reset the scenario and try again with no penalty.

CAMPAIGN LOG

The campaign log found on pages 18 and 19 of this rulebook tracks the progress of the entire campaign. At the end of each scenario, the players record their results by entering the required information in the campaign log.

A printable copy of the campaign log can be found on my Google drive at:

Campaign-Specific Cards

Cards 263–288 are cards that were created specifically for use in the *Hellfire Hunt* campaign. These cards cannot be included in any deck unless playing the *Hellfire Hunt* campaign and the players are directed to add them to a deck by the Campaign Instructions.

CAMPAIGN-SPECIFIC CARDS

During a campaign, campaign-specific cards may be added to encounter decks and player decks. These cards cannot be included in any deck unless playing the Hellfire Hunt campaign and the players are directed to add them to a deck by the Campaign Instructions. Campaign-specific cards do not count toward players' minimum or maximum deck size.

XAVIER'S INSTITUTE

During *Skrull Menace* campaign, players would be as the team leaders of a new team for a special mission, which is to deal with the Healfire Club, and you are going to recruite different mutants members to your team. As X-men, your base is also in Xavier's Institute.

While playing the *Hellfire Hunt* campaign, the campaign instructions would tell you to construct two special deck, includeing a Potencial Ally deck, which refers to a list of potential ally you could find to join your team. Another deck is a Recruited Mutants Deck, which is starts out empty and next to the Xavier's Institute environment, which refers to the ally you had in your team.

POTENTIAL ALLY SIDE SCHEME

The Potential Ally deck would be full of the Potential Ally side scheme. Potential Ally side scheme is a type of side scheme that would be shuffled to the deck. After the side scheme is completed, you would successly invited the ally into your team.

RECRUITED MUTANTS DECK

Recruited Ally is the ally you recruited, they only dispatch when you need them, so you could just trigger the ability of Xavier's Institute, and get 1 ally from the Recruited Mutants deck. After the Recruited Mutants is defeated, put it into the Recruited Mutants discard pile. After the Recruited Mutants Deck is empty, shuffle each cardd from the Recruited Mutants discard pile into the Recruited Mutants deck.

EXPERT CAMPAIGN

For players who want an even more challenging campaign experience, the *Hellfire Hunt* expansion comes with everything you need to play an expert campaign.

- Some Setup and Victory instructions are preceded by **Expert Campaign Only**. Ignore these instructions unless you are playing an expert campaign.

PERSISTENT DAMAGE

While playing the *Hellfire Hunt* campaign at the expert level, each player must record their remaining hit points in the campaign log after they win a game. This determines each player's starting hit points for the next scenario.

- If a player's remaining hit point value is greater than their base hit point value, record their base hit points in the campaign log instead.

The setup instructions for each scenario offer each player the opportunity to restore their identity to their full hit point value by placing an acceleration token on the main scheme.

ELIMINATION AND VICTORY

In an expert campaign, if a player is defeated during a scenario that their teammates go on to win, the defeated player does not participate in the Victory steps of that scenario.

However, during the Setup instructions of the next scenario, the defeated player can rejoin their teammates for the next scenario by placing an acceleration token on the main scheme to restore their identity to full hit points.

SCENARIO #1 - WHITE QUEEN

The White Queen, Emma Frost, launches a daring attack on the X-Mansion, intent on stealing Cerebro's core. Using her formidable psychic abilities, she infiltrates the Xavier Mension, creating illusions and manipulating minds. The heroes must navigate through her telepathic traps and stop her before she can harness Cerebro's power for the Hellfire Club's sinister agenda.

Villain deck: White Queen (1A), White Queen (2A)

Remove White Queen (1A) and add White Queen (3A) for expert mode.

Main Scheme Deck: Infiltrating the Mansion, Locating the Cerebro, Hellfire Ascendant

Encounter Deck: White Queen, Perfection, Hellfire Conclave, Mind Control and Standard sets.

The Hellfire Conclave and Mind Control *sets can be removed from this scenario and/or added to other scenarios when using the scenario customization rules.*

TWO-SIDED VILLAIN

White Queen begins the game in her ***PSIONIC*** form. From there she can be flipped to her ***DIAMOND*** form.

Throughout the scenario, various card abilities will cause White Queen to change forms. When this happens, change the White Queen villain card to the specified form of her card. This is NOT the same as "defeating" the villain, so do not reset her hit points or discard her attachments when she changes forms. But remember, ***PSIONIC*** White Queen is easier to deal with, try to keep her in her ***PSIONIC*** form would be a useful strategy.

In Stage 3A, you will see "incite 1" on White Queen, that would place threat on the main scheme when she flips back to the ***PSIONIC*** form everytime.

If the villain's hit point dial is reduced to zero, the players have defeated that stage of the villain. Remove the current stage of White Queen from the game. The next sequential stage of the White Queen is revealed. **Revealing her in the same form as the one she defeated**. Set the villain's hit point dial as indicated by that stage.

SCENARIO #2 - BLACK KING

While the Hellfire Club cannot retrieve all mutant data from the Cerebro, they possesses a vast network that allows them to obtain information on some powerful mutants. It's unclear what the Black King's evil plan is, but one thing is certain: we must rescue the captured mutants.

When you successfully rescue a **CAPTIVE** mutant, their player card is added to your hand, representing their immediate assistance to your cause. If the **CAPTIVE** mutant ally is later discarded, it goes to your discard pile, simulating their continued presence in your allied forces, ready to be called upon again.

ENERGY COUNTERS

As a mutant with the ability to absorb kinetic energy, Shaw can absorb damage and then execute his own nefarious plans, or harness the energy to attack you. As the Black King, his plans shift depending on the situation, allowing him to focus on his own plans or conserve his energy to defeat you. **CAPTIVE** mutants might be an effective distraction in Stage 2B, but strategy is more important.

TIME ENVIRONMENT

Selene, also known as the Black Queen, is called as a"Moon Goddess". Your confrontation with her is influenced by the celestial cycle, represented by two environment cards: "Under The Moonlight" and "Beneath the Sun". This time-based mechanic adds a strategic layer to your battle against the Black Queen. Each action you take advances time, forcing you to consider whether to operate during the day (gaining bonuses but potentially facing a weaker enemy) or at night (facing a stronger foe but without the sun's benefits). Managing this cycle effectively will be crucial to your success against the Black Queen.

CAMPAIGN INSTRUCTIONS

SETUP:

Remove Emma Frost (A1) and add Emma Frost (A2) for expert mode.

Main Scheme Deck: The Hellfire Club's Revenge

Encounter Deck: Torn, Perfection, Sebastian Shaw, Negasonic Teenage Warhead, Immensity and Standard set.

Sebastian Shaw, Negasonic Teenage Warhead and Immensity set can be replaced by 3 different combination of modular encounter sets, each cointaing an ***ELITE***, ***HELLFIRE*** *minion. Three or more counters trigger Cassandra Domination, forcing players to choose either cripple the villains' plans by adding two threat to each scheme, severely hinder their own hero by stunning and confusing them, or inflict collateral damage on another friendly character.

Main schemes independently presenting further dilemmas to players with control: accept threat or suffer scheme-specific penalties like damage, encounter cards, or discarding.

You can also remove 1 Cassandra Controls counter once per round with the **Hero Action** on each main scheme, but doing so will actually help Cassandra complete her villain deck faster, resulting in the penalty of placing an acceleration token.

KRAKOA

To be honest, after-parties are not really my speed.

Uh, knock knock.

Hello, X-Men.

Technically we're not all X-Men and--

Welcome, Avengers! We are so glad to see so many of Krakoa's friends.

STARTER DECKS

These pre-built decks and character introductions are intended for the player who wants to immediately play the game without customizing their own deck.

MARVEL GIRL / LEADERSHIP

Rachel Summers, alias Marvel Girl, manipulates time to secure victory. Use her signature ability, Chronoskimming, to redraw your hand and reduce the cost of your next card. Combine this with Temporal Retrieval to store key cards like Psychic Blast for later use with Chronoskimming, maximizing their impact. Need a decisive advantage? Unleash Temporal Reversal for a game-changing double turn. As both an **X-MAN** and **X-FORCE** member, Rachel excels with cards like Tempiral Reversal, enhancing her temporal control. Build a deck that balances high-cost power and low-cost efficiency to maximize her abilities and dominate the battlefield.

Marvel Girl cards: *Psyloche, Askani's Prophecies, Black Hole (x2), Psionic Blasts (x2), Telekinetic Counterblast (x2), Temoral Reversal, Clan Askani, Psionoc Shield, Temporal Retrieval (x2), Telekinetic Axe, Telekinetic Sword,*

This allows for powerful combos with cards like Blazing Strike, expending solar counters for significant damage. Strategic counter management is crucial, however. Running out of counters triggers his forced response which turning to alter-ego form. While in his alter-ego form, Sunspot focuses on recovery, utilizing his alter-ego ability and cards like Soak Up The Sun to replenish his solar reserves. As both an **AVENGER** and an **X-FORCE** member, Sunspot has access to a diverse card pool, allowing for flexible deckbuilding strategies that capitalize on both affiliations. FREQUENTLY ASKED QUESTIONS

SCENARIO #1 — WHITE QUEEN

Q. What happens when White Queen schemes in *DIAMOND* form and that scheme advances the main scheme deck?

A. When White Queen is in ***DIAMOND*** form and schemes, if the main scheme advances, the **When Completed** ability will flip White Queen to ***PSIONIC*** form. Since she is no longer in ***DIAMOND*** form, she will not flip again after scheming. In the rare case that this happens after drawing Crystalline Adaptation as a boost card, the boost ability will flip her to ***PSIONIC*** form, then the threat will be placed and the **When Completed** ability will flip her back to ***DIAMOND*** form, and then her response to scheming will trigger and she will flip back to ***PSIONIC*** form again.

SCENARIO #2 — BLACK KING

Q. What is the limit (once per round per player) in the Forced Response for Main Scheme 2B Operation Hellfire Ascendant?

A. This means that as a player, you can trigger this ability only once per round. You can exhaust a captive ally you control, and you can do this on another player's turn. However, you can only trigger it once per round. If you have more than one captive ally, you cannot trigger it twice, so you should think strategically about how to use your captive allies.

Q. What does "(Max 1 👤 times per round)" mean in the King's Tactic ability from "And What is Theirs... Is Mine"?

A. This means that only the first instance of the 1 👤 effect will trigger the King's Tactic ability. If the effect triggers again beyond this limit, it will not activate *King's Tactic*, and the energy counter will instead be stacked on Sebastian Shaw. Additionally, the maximum does not include any instances triggered on the Black King side (before it flips).

SCENARIO #4 — TORN

Q. Still thinking

A. Still thinking

SCENARIO #5 — CASSANDRA NOVA

Q. What if the Cassandra Domination triggers, and there is only one another friendly character with less then 3 remaining hit point?

A. When Cassandra Domination triggers, and you only have one other friendly character with less than 3 hit points, your options are limited. Normally, you could choose between dealing 3 indirect damage, stunning/confusing yourself, or placing threat on the schemes. However, you can't deal the full 3 indirect damage among another friendly characters in play since your ally cannot take it all, and you cannot damage yourself. This eliminates the damage option. If you're already stunned or confused, that option is also out. Therefore, if you're already stunned orconfused, placing threat is your only choice. If not, you can choose between placing threat or stunning and confusing yourself.
